APPLICATION AS AMENDED - PART II

AMENDMENT 8

1. The length of the cable is approximately 100 feet. The cable is made of a material that is resistant to fire and is capable of withstanding temperatures up to 1000 degrees Fahrenheit. The cable is used to connect a fire alarm system to a fire alarm control panel. The cable is installed in a conduit and is protected by a fire-rated enclosure. The cable is tested and certified to meet the requirements of the National Fire Protection Association (NFPA) and the International Fire Code (IFC). The cable is also tested and certified to meet the requirements of the National Electrical Code (NEC) and the National Electrical Manufacturers Association (NEMA). The cable is used in a variety of applications, including fire alarm systems, fire alarm control panels, and fire alarm control units. The cable is also used in other applications, such as fire alarm control panels, fire alarm control units, and fire alarm control systems. The cable is used in a variety of applications, including fire alarm systems, fire alarm control panels, and fire alarm control units. The cable is also used in other applications, such as fire alarm control panels, fire alarm control units, and fire alarm control systems.
